

# NEW TRADITION

## From Tradition, Innovation

Takenaka Carpentry Tools Museum (Kobe).

In Japanese it is called “takumi no waza” which is craftsmanship—but not just that.

This is artisanship that draws upon the traditions and achievements of all who came before.

Not just backward looking but forward looking too, it is the secret of our ability to innovate.

This museum aims to not just preserve a long cultural heritage but to make it available as a source of wisdom and inspiration for future architects, 10, 20 or 100 years from now.

Takenaka Corporation adds value, integrating design, technology and the environment.

We enrich architecture.

Dreams into Reality for a Sustainable Future
